

What Is IV Nutrition?

Intravenous nutritional therapy is commonly used for its wide range of health benefits. Because IV treatment is administered directly into the veins, the results may be faster than those of oral or other traditional medicines. Physicians believe IV nutrient therapy can be safe, effective and restorative.

Possible Benefits of IV Nutrient Therapy:

- Bypasses the digestive system for 100% absorption
- Boosts energy + metabolism
- Detoxifies the body
- Enhances the immune system
- Helps prevent illness + viral infection
- Decreases pain + inflammation
- Combats chronic fatigue
- Promotes healing + recovery
- Rejuvenates skin, hair + nails
- Assists with age management
- Reverses symptoms caused by disease + malnutrition
- Can be customized to suit the unique needs of each patient

What Are Nutrient Injections?

Nutrient injections are a form of nutritional therapy whereby vitamins, minerals and amino acids are given through an intramuscular injection. As a result, nutrient injection therapy bypasses the digestive system allowing for a more direct route to the circulation and to ensure 100% absorption.

What Is the Difference Between IV Nutrient Drips & Nutrient Injections?

IV drips are a mixture of IV nutrients that are combined in fluid (250-1000ml) and administered intravenously over 30 minutes to 2 hours. IV drips consist of a larger dosing of nutrients than injections. Injections are a smaller dosing of specific vitamins, minerals, and amino acids that are injected intramuscularly. Injections take about 10 seconds to administer and have equivalent absorption as IV drips.

Recovery & Performance IV

Shorten the time of recovery after an injury and potentially improve athletic ability. This IV replenishes essential nutrients, reduces inflammation, decreases recovery time and enhances athletic performance.

Ascorbic Acid | B1, B2, B3, B5 & B6 | Glutamine | Arginine | Ornithine | Lysine | Citrulline | Methyl B12 | Carnitine | Magnesium Chloride | Calcium Chloride | Zinc | Copper | Selenium

\$115

Alpha Lipoic Acid IV

Alpha-lipoic acid (ALA) is an antioxidant that is made by the body and is found in every cell, where it helps turn glucose into energy. Antioxidants are substances that attack "free radicals," waste products created when the body turns food into energy. Antioxidants are depleted as they attack free radicals, but evidence suggests alpha-lipoic acid may help regenerate these other antioxidants and make them active again. ALA through IV administration may help reduce symptoms associated with diabetic peripheral neuropathy and an adjunctive therapy for cancer patients.

\$99

High Dose IV Vitamin C

HDIVC, ascorbic acid (vitamin C) has been recognized as one of the best antioxidants and nutrients available to combat numerous health problems. Through IV administration, levels can be administered 100x higher than through oral administration. At higher levels vitamin C acts as a pro-oxidant which is rapidly absorbed by cancer cells and has been shown to have a highly toxic effect promoting apoptosis (cell death). HDIVC is used alone, or in conjunction with chemotherapy and radiation as an effective cancer treatment protocol.

25g Vitamin C \$100

50g Vitamin C \$130

75g Vitamin C \$160

Get-Up-And-Go IV

Kick-start your metabolism and feel more energized. This IV helps burn fat, boosts metabolism and provides the nutrients needed for optimal wellness and performance.

B1, B2, B3, B5 & B6 | Glutamine | Arginine | Ornithine | Lysine | Citrulline | Methyl B12 | Carnitine

\$89

Inner Beauty IV

Designed to help bring out radiance and natural glow, this IV includes premium-quality compounds believed to fortify hair, skin and nails, reduce wrinkles, acne and quench skin from the inside out.

Ascorbic Acid | B1, B2, B3, B5 & B6 | Biotin

\$95

Quench IV

Rehydrate your body and combat fatigue caused from dehydration with the Quench IV. This IV replenishes the fluids needed to rehydrate your body, detoxify your system, restore essential vitamins, reduce inflammation, improve circulation and fight fatigue.

Ascorbic Acid | B1, B2, B3, B5 & B6 | Magnesium Chloride | Calcium Chloride | Zinc | Copper | Selenium

\$95

Alleviate IV

Alleviate headache, decrease risk of developing migraines and relieve the symptoms of PMS. This customized IV includes premium-quality compounds which may reduce bloating, irritability, abdominal discomfort and lower back pain.

Calcium Chloride | Magnesium Chloride | B1, B2, B3, B5 & B6 | Hydroxocobalamin B12

\$95

Immunity IV

Designed to help your immune system, prevent illnesses and make you feel better faster after getting sick. This IV includes premium-quality compounds that can help protect against infection, improves healing time, reduces duration of illness and builds up your immune system.

Ascorbic Acid | B1, B2, B3, B5 & B6 | Glutathione

\$95

Myer's Cocktail

Restore your body's natural balance, reduce seasonal allergies, fatigue, inflammation and chronic pain. Comprised of essential multivitamins and other nutrients, this IV provides hydration, improves immunity, reduces chronic symptoms associated with pain, asthma or migraines and helps to alleviate stress.

Magnesium Chloride | B1, B2, B3, B5 & B6 | Hydroxo B12 | Calcium Gluconate | Ascorbic Acid

\$99

Glutathione IV

Glutathione (GSH) is commonly known as the body's most important antioxidant. It fights almost any disease, particularly those associated with aging. It is primarily produced in the liver, but GSH levels fall dramatically as we age. When taken orally, Glutathione is not well absorbed by the body. Therefore, the only effective way to dramatically increase GSH levels is through IV infusion or direct injection. Glutathione prevents and reverses the effects of toxins and free radicals, rejuvenates skin and cleanses vital organs. Medical trials have shown that IV glutathione supplementation resulted in the improvement of symptoms associated with Parkinson's Fibromyalgia, Alzheimer's, MS/MD, Liver Disease, Autoimmune Diseases/Weakened Immune System, Adrenal Fatigue/Chronic Stress, Male Infertility and the reduction in the negative effects of chemotherapy.

GSH IV \$95

Add GSH to any drip \$60

Nutrient Injections⁺

- Glutathione \$22
- Vitamin B12 \$22
- CALM
- GABA/Mg/Taurine/Theanine \$22
- Vitamin D3 \$44
